JOHN CAGE'S INDETERMINACY THEN AND NOW: 1992 INTRODUCTION BY RICHARD KOSTELANETZ

In Zen they say: If something is boring after two minutes, try it for four. If still boring, try it for eight, sixteen, thirty-two, and so on. Eventually one discovers that it's not boring at all but very interesting.

John Cage

For most of the world, most of the time, John Cage (b. 1912) is an international avant-garde composer; for me he has always been an innovative American writer. My introduction to his writing came not from something in print but from Indeterminacy (1959), which appeared as a two-record box on Folkways a few years before his first book, Silence (1961). Until then, you would have had to see Cage perform to appreciate his writing; very little of it had ever appeared in print.

The idea behind Indeterminacy was, like many Cagean ideas, essentially simple, if audaciously original. In one acoustic space he would declaim any of ninety stories, taking a minute to finish each one. Thus, those with many words were necessarily read quickly; those with a few words, slowly. In another room, beyond a earshot of Cage, the pianist David Tudor, by that time a veteran Cage collaborator, was playing miscellaneous sections from his parts for Cage's Concert for Piano and Orchestra (1957–58), occasionally playing as well prerecorded tape from another Cage composition Fontana Mix (1958–59). As Cage wrote at the time, "David Tudor was free to make any continuity of his choice. There was no rehearsal beforehand involving both the reading and the music, for in all my recent music there are parts but no score."

Cage's stories tend to fall into several groups. Some are meant to be illustrations of his Buddhist devotion to his esthetics of accepting all sounds as equally legitimate. At a respite following a Zen service, he remembers, "The hostess and her husband, employing an out-of-tune piano and a cracked voice, gave a wretched performance of an excerpt from a third-rate Italian opera. I was embarrassed and glanced toward the Roshi to see how he was taking it. The expression on his face was absolutely beatacific." Before a demonstration like this, Cage was forced to learn how far he had to go.

A recurring theme is overcoming adversity, as Cage tells the story of his teacher Arnold Schoenberg informing his
pupil Cage that he had no feeling for harmony. "He then said that I would always encounter an obstacle, that it would be as though I came to a wall through which I could not pass. I said, 'In that case I will devote my life to beating my head against that wall.'" What happened, of course, is that Cage made a constraint of his defect, composing a music so consistently devoid of harmony that it was scarcely missed.

Some stories portray Cage's love for nature and especially for mushrooms. From them follow stories of his cooking and eating not just mushrooms but cabbages and hot peanuts. Yet others tell of the experience of touring, not only as a solo musician but as the music director of the Merce Cunningham Dance Company. He likes to recall the witty remarks of his friends, such as the painter Jasper Johns and the late composer Morton Feldman. Few, to my recollection, speak of his reading, or his experience of art, or his opinions about music. Some are funny in the tradition of Twain, with an eternally innocent writer who is surprised at the foibles of the world. Like traditional comedy, but unlike tragedy, Cage's stories assume that all will turn out well in the end.

The acoustic innovation is the one-minute story, declaimed at varying speeds reflective of the stories' lengths, in sum redeeming the otherwise decadent form of the solo literary recital. Indeterminacy also represents Cage's comment on poetry and jazz, a complementary mixing of music and language that was popular in the 1950s. Always there is an elegance and wit that are uniquely Cagean, even for the print his stories display a distinctive prose. Since he has always been the most adept performer of his own writing, this record gives these unusual stories an even more unique voice. He later used these texts, along with new ones composed within the same constraint, as his contribution to the Merce Cunningham piece How to Pass, Kick, Fall and Run (1965), the dancers replacing David Tudor, so to speak. The paragraph-long story was a form, a constraint, Cage mastered, much as he would later master the mesocosm.

The texts for many of these stories may be found in Cage's first two books, A Year from Monday (1967) and Silence (1961). In the latter they appear not only in the chapter marked "Indeterminacy" (pp. 260-273), but scattered throughout its pages, as Cage put it, "playing the function that odd bits of information play at the ends of columns in a small-town newspaper." He continues, "I suggest that they be read in the manner and in the situations that one reads newspapers— even the metropolitan ones—when he does so purposelessly: that is, jumping here and there and responding at the same time to environmental events and sounds." It follows that the disc Indeterminacy need not be heard in silence; it is perfectly appropriate to play it in a space filled with other sounds, even the noise of traffic or a radio(s) that could be playing yakati-yak as well as music.

One key to Cage's esthetic is the absence of hierarchy. Just as no story in Indeterminacy is necessarily more important than any other, so none is necessarily a beginning of the piece and none necessarily an end; they resemble slips of paper that are picked at random from a bowl until the bowl is empty. "My intention in putting the stories together in an unplanned way," he writes in Silence, "was to suggest that all things—stories, incidental sounds from the environment, and by extension, beings—are related, and that this complexity is more evident when it is not oversimplified by an idea of relationship in one person's mind."

For these performances of Cage and Tudor there was no definite beginning and no definite end. Quite simply, they began apart from each other and played until time ran out. Since each performer had his own stopwatch, there was reason to expect they would end around the same time. Indeterminacy exemplifies the flat, uninflected structure of superficially disconnected events that has always characterized Cage's music and, to no surprise, Merce Cunningham's dance. My own interpretation is that the scrupulous absence of hierarchy reflects not only Zen Buddhism, which Cage studied intensively at Columbia University in the late 1940s, but an anarchism that has informed his art and activities since the 1930s.

One theme is that indeterminacy differs from improvisation, because indeterminacy incorporates imaginative constraints. The idea of the poetry-jazz duets was that speaker and musicians would respond to one another, each spontaneously trying to reenforce the other, customarily in habitual ways. The principle of indeterminacy allows each performer to work apart from the other, indeed in this case unawares of each other, each with scores designed to minimize habit. If a reader is required to speak only fifteen words in sixty seconds, he or she cannot resort to pet ways of phrasing. Those familiar with avant-garde
contemporary radio, especially as it is produced in Germany, can identify Indeterminacy as early Neue Hörspiel in that it is a primarily acoustic experience, involving speech as well as sounds. Indeed, Indeterminacy could be characterized as a radio program (that wouldn’t benefit from a picture) of an avant-garde kind that wasn’t produced in America at that time. It could also be classified as an early Cage “play” in a distinguished theatrical career.

Though Cage is, to my mind, a major American prose writer, who was recently the Charles Eliot Norton Professor of Poetry at Harvard, you won’t find his name in any history of American literature; you won’t find any articles about his writing in the annual indices of the Publication of the Modern Languages Association. Even in this age of extensive study of contemporary literature, of the National Endowments for the Arts and the Humanities, it is still possible for a well-known American writer to do distinctive work that is academically ignored.

Thirty-three years later (yes, a full thirty-three), it is good to have Indeterminacy back.

Richard Kostelanetz, 1992

Richard Kostelanetz has written many critical/historical books about contemporary literature, music, and art. His art incorporates words, numbers, and lines, into books, prints, audiotape, videotape, holography, and film. His audiotape composition, Invocations, appears on Folkways 37902.

Sounds of New Music 6160
SMITHSONIAN/FOLKWAYS RECORDINGS

Folkways Records was founded by Moses Asch and Marian Distler in 1949 to document music, spoken word, instruction, and sounds from around the world. Benefiting from their experience with the Asch and Disc labels, New York City-based Folkways became one of the largest independent record companies in the world, with a total of nearly 2,200 albums that were always kept in print.

The Smithsonian Institution acquired Folkways from the Asch estate in 1987 to ensure that the sounds and genius of the artists would be preserved for future generations. All Folkways recordings are now available on high quality audio cassettes, each packed in a special box along with the original LP liner notes.

Smithsonian/Folkways Recordings was formed to continue the Folkways tradition of releasing significant recordings with high quality documentation. It produces new titles, reissues of historic recordings from Folkways and other record labels, and in collaboration with other companies also produces instructional videotapes, recordings to accompany published books, and a variety of other educational projects.

The Smithsonian/Folkways, Folkways, Cook, and Paredon record labels are administered by the Smithsonian Institution's Center for Folklife Programs and Cultural Studies. They are one of the means through which the Center supports the work of traditional artists and expresses its commitment to cultural diversity, education, and increased understanding.

You can find Smithsonian/Folkways Recordings at your local record store. Smithsonian/Folkways, Folkways, Cook, and Paredon recordings are all available through Smithsonian/Folkways Mail Order, 416 Hungerford Drive Suite 320, Rockville MD 20850, Phone 301/443-2314; fax 301/443-1819 (Visa and MasterCard accepted).

INDETERMINACY
NEW ASPECT OF FORM IN INSTRUMENTAL AND ELECTRONIC MUSIC
JOHN CAGE, 1959

For over 20 years I have been giving lectures. Many of them have been unusual as lectures, simply because I employed in them means of writing analogous to my composing means in the field of music. My intention was, often, to say what I had to say in a way which would exemplify it, which would, conceivably, permit a listener to experience it rather than to just hear about it. This means, essentially, that, being, as I am, engaged in a variety of activities—I attempt to introduce into each one of them aspects conventionally limited to the others. So it was that I gave about 1949 my Lecture on Nothing at the Artists' Club on 8th Street in New York City (the artists' club started by Robert Motherwell that predated the popular one associated with Philip Pavia, Bill de Kooning, et. al.). This Lecture on Nothing (recently published in In Contrari Musicali) was written in the same rhythmic structure I employed at the time in my musical compositions (Sonatas and Interludes, Three Dances, etc.). One of the structural divisions was a repetition of a single page in which the refrain occurred "if anyone is sleepy let him go to sleep" some 14 times. Jeanne Reynal, I remember, stood up part way through, screamed, and then said, while I continued speaking, "John, I dearly love you, but I can't bear another minute." She then walked out. Later, during the question period, I gave 5 prepared answers regardless of the questions. This was a reflection of my engagement in Zen. At Black Mountain College, I organized an event which involved the paintings of Bob Rauschenberg, the dancing of Merce Cunningham, films, slides, phonograph records, radios, the poetry of Charles Olsen and M. C. Richards recited from the tops of ladders, the pianism of David Tudor, together with my lecture which ends: "A piece of string, a sunset, each acts." The audience was seated in the center of all this activity, and, later that summer, vacationing in New England, I visited America's first Synagogue to discover that the congregation was there seated precisely the way I had arranged the audience at Black Mountain. As I look back, I realize that this concern with poetry was early with me. At Pomona
College. I decided to write 60 more stories and to ask David Tudor to make a 90-
minute accompaniment for the occasion. He did this using material from the
Concert for Piano and Orchestra, employing several radios for noise elements.

A few days after the talk was given at
Columbia, I went to see Emile de Antonio.
I gave him a copy of the stories. After he
read them, he telephoned to say they
should be published. I mentioned this to
David Tudor. He said, "It
should be published as
a record." The next day
I got a letter from Roger
Maren. He wrote to say
that he had just seen
Moe Asch who was
interested in recording
something of mine. I
telephoned Moe Asch
and we made an
appointment. The day was set for the
recording so that it could be made before
David Tudor returned to Europe. David
Tudor said, "Instead of radios, I'd like to
use tracks from the Fontana Mix." I said,
"Fine."

It took about an hour and a half for
the recording engineer, Mel Kaiser, to set
up the studio. Finally he asked me to
speak a little to get the level. Then he did
the same for the piano, the whistles, the
tape machines and the amplified snikly.
Then he said, "We're ready." However, I no
sooner started speaking than he stopped
me. I said, "What's the trouble?" He said,
"You shouldn't pause the way you do
between words; you should just speak
naturally." I said, "But this is what I have
to do. I tell one story a
minute, and, when it's a
short one, I have to
spread it out. Later on
when I come to a long
one, I have to speak as
rapidly as I can." He
said, "O.K. I'll just
keep my mouth shut."
After the first side was
made, he said, "I'm
beginning to get the
idea. I think we'd
better do it over again." What had
happened was that he had tried to get some
kind of balance, rather than just letting the
loud sounds occasionally drown out my
voice. I explained that a comparable visual
experience is that of seeing someone across
the street, and then not being able to see
him because a truck passes between. We

Late in September in 1958 I was in
Stockholm in a hotel. I set about writing
the present lecture which I was obliged to
give a week later at the Brussels Fair. I
recalled a remark made years before by
David Tudor that I should make a talk that
was nothing but stories. The idea was
appealing when he gave it to me but I had
never acted on it. A few weeks before, in
Darmstadt, Karlheinz Stockhausen had
said, "I'll publish your Brussels talk in Die
Reihe." I replied, "You'd better wait and see
what it is I write." He said, "No matter
what it is, I'll publish it."

When the talk was given in Brussels, it
was just the first 30 stories and without
musical accompaniment. A recital by
David Tudor and myself of music for two
 pianos followed the lecture. The title was
Indeterminacy: new aspect of form in
instrumental and electronic music.
Karlheinz Stockhausen was in the
audience. Later when I was in Milan
making the Fontana Mix at the Studio di
Fontologia, I received a letter from
Karlheinz Stockhausen asking for a text for
Die Reihe. I sent the Brussels talk. He
published it.

When I got back to America in March
1959, there was a letter from Jack Arends
asking me to lecture at Columbia Teachers
College. I wrote in the manner of
Gertrude Stein, irrelevantly and
repetitiously. I got an A. The second time
I did it I was failed. And between the
Lecture on Nothing and the one here
recorded, there are at least a dozen which
are unconventionally written, notably the
London Lecture which was written by
means of chance operations, and the
Rutgers Lecture which is largely a series of
questions left unanswered. When M. C.
Richards asked me why I didn't one day
give a conventional informative lecture
(addling that that would be the most
shocking thing I could do), I said, "I don't
give these lectures to surprise people, but
out of the need for poetry." As I see it,
poetry is not prose, simply because poetry
is one way or another formalized. It is not
poetry by reason of its content or
ambiguity, but by reason of its allowing
musical elements (time, sound) to be
introduced into the world of words. Thus,
traditionally, information, no matter how
stuffy (e.g. the sutas and shastras of
India), was conventionally transmitted by
poetry. It was easier "to get" that way.
(Karl Shapiro may have been thinking
along these lines when he wrote his Essay
on Rime in poetry.)
then made the first record over again, and continued with the other three. At the end of the session, David Tudor said, "You may want to cut that last sound I made at the piano. It's an ugly one." Editing, which took place the following week, was minimal. I lowered the level on my voice at one point near the end, and took out an echo that had developed on the tape before one sound somewhere in the middle. I didn't cut out the last sound as David Tudor had suggested, for to my ear it sounded perfectly acceptable. All this time, Moe Asch was out of town. When he returned, he listened to the record, and then called to say he was delighted. I said, "I'm glad you are, because I am too." He said, "When you write the album notes, write as much as you wish. Don't stint. And technical information too."

Most of the stories are things that happened that stuck in my mind. Others I read in books and remembered, those, for instance, from Kwang-Ise and Sri Ramakrishna. The 2nd, 15th, 16th, 46th and 75th stories are to be found somewhere in the literature surrounding Zen. The statement, "Split the stick and there is Jesus," (19th story) comes, perhaps, from Huxley's Perennial Philosophy, which I read when it first came out. The 29th story I read in one of Martin Buber's books. The 61st story is told in Joseph Campbell's Hero with 1000 Faces. Xenia (stories 72 and 73) is Xenia Cage. She was Xenia Andrejevna Kashevaroff whom I married in 1935; we were divorced 10 years later. Malcolm Roberts first delivered the lecture on Japanese Poetry (78th story). We (he, Xenia and I) were sitting, quite drunk, in a Seattle gutter; it was a full moon. He claimed that it had been given at the University of Washington by a Japanese scholar. Virgil Thomson told me the story about Chabrier, "the dirty" composer (story number 58). Henry Cowell told me the story about the Eskimo lady (the 25th). Merce Cunningham picked up, I don't know where, the one about the Japanese Abbott (the 13th). It may be discovered that I have remembered some of these stories inaccurately. However, this is the way they are now as far as I am concerned.

The continuity of the 90 stories was not planned. I simply made a list of all the stories I could think of and checked them off as I wrote them. Some that I remembered I was not able to write to my satisfaction, and so they do not appear. Whenever I have given the talk, someone comes up afterwards and insists that the continuity was a planned one, in spite of the ideas that are expressed regarding purposelessness, emptiness, chaos, etc. One lady, at Columbia, asked, during the discussion following the talk, "What, then, is your final goal?" I remarked that her question was that of the John Simon Guggenheim Memorial Foundation to applicants for fellowships, and that it had irritated artists for decades. Then I said that I did not see that we were going to a goal, but that we were living in process, and that that process is eternal.

My intention in putting 90 stories together in an unplanned way is to suggest that all things, sounds, stories (and, by extension, beings) are related, and that this complexity is more evident when it is not over-simplified by an idea of relationship in one person's mind.

David Tudor plays material from his part of the Concert for Piano and Orchestra (1957-58), using tracks from the Fontana Mix (1958-59) as noise elements where these are notated in the Concert. (Manuscript pages of the Concert, together with notes and analytical statements, appear in the recording of my 25-year Retrospective Concert at Town Hall, issued by George Avakian, 10 W. 33rd St., N. Y. C. Other manuscript pages, originals, are available at the Stable Gallery, 58th and 7th Ave., N. Y. C.) David Tudor was free to make any continuity of his choice. There was no rehearsal beforehand involving both the reading and the music, for in all my recent music (since Music for Piano) there are
parts but no score. Each one of us rehearsed alone and employed a stopwatch during the actual recording session. Each did what he had to do, bringing about a situation which neither had foreseen.

The manuscript of the Fontana Mix is on transparent plastics which may be superimposed in any number of ways. There are ten sheets having points, and ten having differentiated curved lines. There is also a single straight line and a graph having 100 units horizontally and 20 vertically. By placing one of the sheets with points over one with curves and then superimposing the graph, it is possible to connect a point within the graph with one outside by means of the single straight line, and to make measurements which define the production of the sound in a studio for making tape music, specifically, the choice of sound source, alterations of frequency, amplitude, timbre, duration, mixtures, loops, and splicing. More detailed information regarding my methods of producing tape music with special reference to the Williams Mix appear in the Avakian album referred to above.

Critics frequently cry, “Dada,” after attending one of my concerts or hearing a lecture. Others bemoan the interest in Zen. One of the liveliest lectures I ever heard was given by Nancy Wilson Ross about 1937 at the Cornish School in Seattle. It was called Zen Buddhism and Dada. There is a connection possible between the two, but neither Dada nor Zen are fixed tangibles. They change; and in quite different ways in different places and times, they invigorate actions. What was Dada in the twenties is now, with the exception of the work of Marcel Duchamp, just art. What I do, I do not wish blamed on Zen, though without my engagement with Zen (attendance at lectures by Alan Watts, D. T. Suzuki, reading of the literature) I doubt whether I would have done what I have. Recently, I am told, Alan Watts has questioned the relation between my work and Zen. I mention this in order to free Zen from any responsibility for my actions. I shall continue making them, however. I often point out that Dada nowadays has a space, an emptiness, in it that Dada formerly lacked. What, nowadays, New York-mid 20th Century, is Zen?
